Open the Jar / Production Management, Modeling, Texturing

July 2023 Ongoing, Viborg

A point-and-click video game in development by Director Federica Lazzari. I've been overseeing and developing the production from the beginning, managing a smaller team of artists. The game is in later stage of production.

Late Love Production / Modeling, Texturing, Rigging

Oktober 2024 - December 2024, Viborg

I was hired for the 3D shortfilm "The Right To Be Forgotten". The job consisted of taking existing 3D scanned, bipedal models to an animation ready state in Maya. The models had to be retopologized, then the textures were projected and cleaned up. Lastly the models were rigged and skinned.

Lana Tankosa Nikolic of Late Love Production has agreed to be a reference for my work and can be contacted upon request.

The Animation Workshop / Librarian

November 2022 Ongoing, Viborg

A self organized job where I reformed and now maintain the faculty library. I had to rearrange the library and transfer all books between systems. Since then I have been maintaining all borrowing and registers. I also produce posters, signs, and informational graphic design for the Library.

The Animation Workshop / Tour Guide

August 2023 Ongoing, Viborg

I facilitate tours for guests at the faculty once a month. I have to adjust the contents of the tour to the needs of the individual group. The guests are anyone from applicants to industry professionals and government officials.

education

Baltzer Games / Store Manager

April 2022 - July 2022, Copenhagen

A short term contract, where I was hired to start up a board game store and setup their inventory and systems. The position required high independence and had many hours a day where I was running the store and inventory alone. I was also responsible for several distributor relations.

Bræt og Brikker / Assisting Store Manager

November 2019 - July 2021, Copenhagen

I had a smaller sized team of part time workers to manage, and it was my responsibility to make sure they had a responsible amount of work to do. I also handled customers, distributor relations and product orders.

VIA University College - The Animation Workshop

/ Professional Bachelor of Computer Graphic Arts

August 2022 - January 2026, Viborg

The educational programme is highly general and I have leaned into the generalist, management and pipeline aspects of the productions I have been in. I am usually involved in setting the pipeline of the production and I have also tried out production management and Directing.

VIA University College - The Animation Workshop

/ Semester in Classical Drawing

August 2021 - December 2021, Viborg

The course covered fundamentals of construction, value, composition, perspective and other essential pillars of successful visual art. I was taught in drawing with charcoal, pencil, pastel, and painting.

about me

When I am not working I like to read comics, play board games, and video games. I've been warming up to making my own comic for a while and I have a few game development projects I like to tinker with.

I care a lot about community and cultural heritage. Recently I've been getting invested in danish iron age findings and Scandinavian prehistoric art. I would like to shine light upon it in the future, to talk about how generations connect through the things we make.
